**QUESTION 2 – With which of the following statements do you agree, now that we have a new Government?**

# RESEARCH METHODOLOGY

The survey included

Albanian **815**, Serb **150**, other minorities **100**.

The survey was conducted through CATI (computer-assisted telephone interviews) technique.

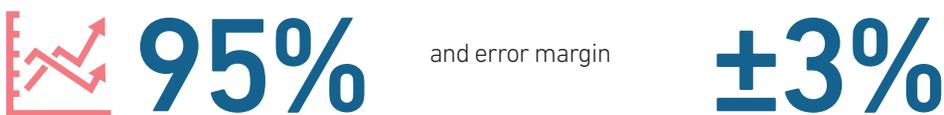

Surveying was done through telephone calls and data were processed through survey management software.

Gender of respondents:

confidence interval

|||||

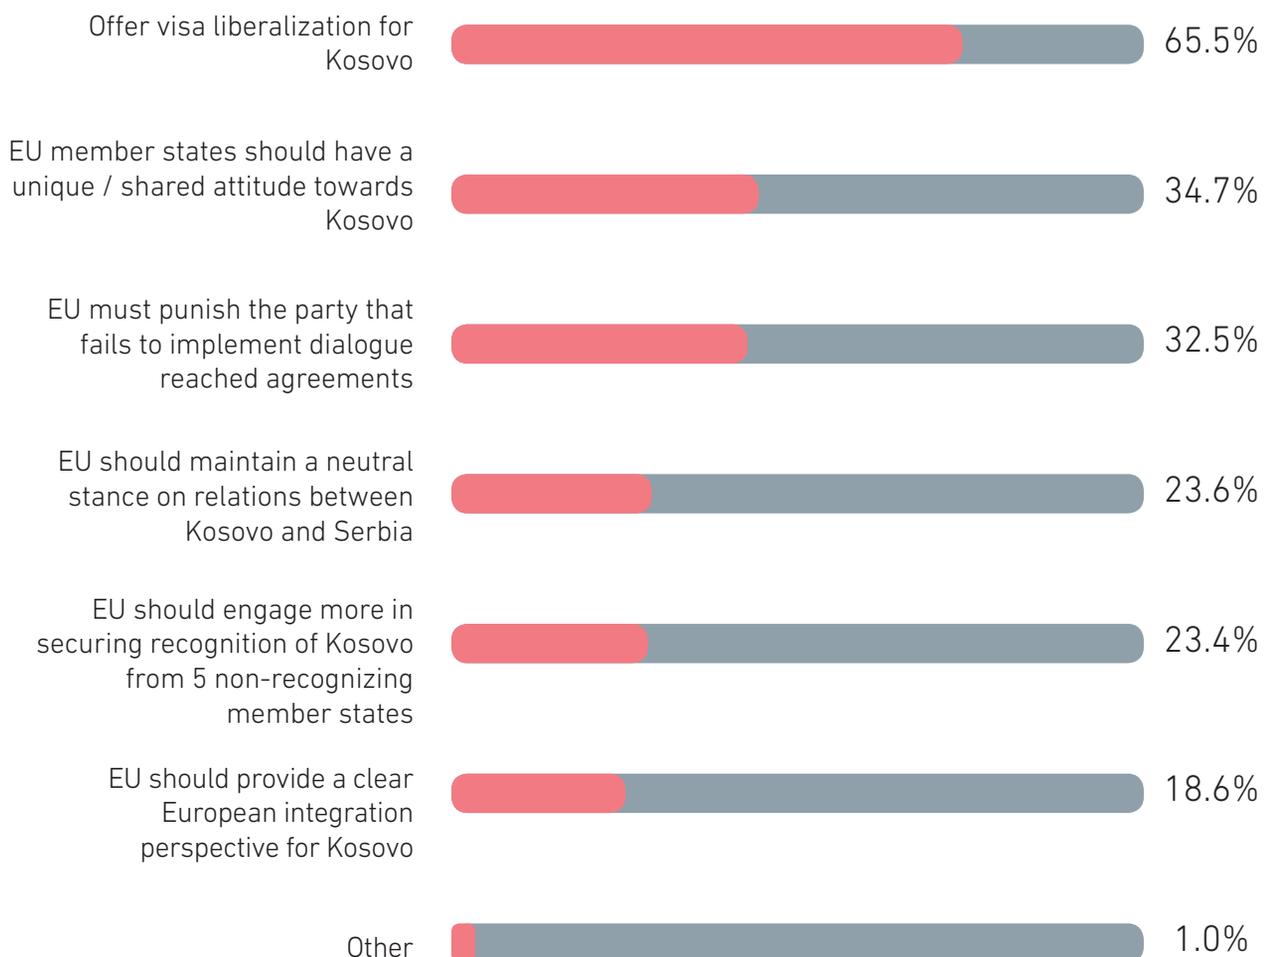

- For designing the sample, UBO Consulting used the common multiple layering technique.
  - Initially, the sample was divided into three sub-samples by ethnicity living in Kosovo;
  - Subsequent stratification of the sub-samples was done based on the municipality by PPS (probability proportional to size) technique;
  - The last stratification was done on the basis of settlement.
  
- After the sample has gone through all the strata, the selection of the main list and reserve list of potential respondents was done through Excel standardization technique.
  
- At the end, the data are weighted so that the final results reflect the population structure by ethnicity, age, gender and education.
  
- Survey period: 13 - 20 March 2020
